

AIPC

Amphenol Interconnect Products Corp.

Power Distribution

Amphenol Interconnect Products Corp. has a broad expertise in the Cable Assembly, Connector, and Bus Bar area. We can offer you a complete solution to all your power distribution requirements. AIPC can integrate your complete system with a customized engineered solution which can start distributing power from your power source directly through a custom Bus Bar, Connector, or Wiring Harness all engineered specifically to meet your needs.

Key Features

- > Low voltage drop and low inductance
- > Reduced RFI, EMI, cross talk
- > Greater electronic noise filtering
- > Higher capacitance resulting in lower impedance
- > Improved reliability and power systems life by replacing unreliable cabling and wiring harnesses
- > Denser packaging, individually engineered to fit customers' applications minimizing space taking wiring harnesses and cables while increasing air flow
- > Mating with power supply, motherboards, etc
- > Easier installation, eliminating any errors while reducing installation time
- > Reduced systems costs minimizing parts count, material handling and inventory
- > Wider choice of input/output methods, allowing a verity of interconnect styles
- > Improved thermal characteristics
- > Structural support

Applications

- > Single conductor (insulated and uninsulated)
- > Multiple Conductor
 - Laminated
 - Powder Coated
 - Open Edge
 - Pinched Edge
 - Epoxy Edge Filled
